**Student-centric methods are used for enhancing learning experiences by:**

- 1. Experiential learning:** Various experiential and observational techniques of teaching and learning are followed in our institution, such as training the students using chalk and board, using charts and flipcharts, teaching anatomic structures to students using skulls, training using dental models of various techniques such as cavity preparation, fillings, scaling, flap incisions, suturing techniques, impressions and many more. Students are also encouraged to assist staff and senior P.G's during various non-surgical as well as surgical procedures. Basic implant training is also imparted using models and CBCT. A regular parent teacher meeting takes place periodically to inform the parents of their ward's progress.

**Training using Blackboard and Chalk**
