Summary:

Basic Medical Science Practical Laboratory : Well-equipped practical Laboratories are available in all basic medical science departments to create a platform for understanding the basic concepts of subjects like Anatomy, Physiology, Biochemistry, Pharmacology, Pathology and Microbiology.

Dental Anatomy and Histology: A well-equipped museum with an extensive collection of specimens helps to give students a broader perspective in both normal anatomy and various pathologies. Besides this, the department has an elaborate collection of slides which encompasses the entire pathologic spectrum. Pre-clinical conservative phantom head tables with accessories are present for the simulation training of the pre-clinical student on various treatment procedures. All the units are equipped with airtor and micro motor control so that the students can be trained in high speed as well.

Pre-clinical prosthodontics Furnished with a seating capacity of 100 and individual gas connection and compressor lines and electrical connection, the students work under the supervision of faculties. The Dry-lab has lathes and trimming facilities and the wet lab has model trimmers operated in wet condition and provision to manipulate dental materials for the fabrication of casts, models and dentures.
